A107. OBSOLETE SERVICE OFFERINGS - COIN TELEPHONE SERVICE**A107.1 Reserved for Future Use****A107.2 Semi-Public Telephone Service****A107.2.1 Definition and Requirements**

(Obsoleted 9-2-96, Type 2. Not offered for installations on and after September 2, 1996.)

- A. Semi-public telephone service is that class of individual line exchange service furnished in locations which in the judgment of the Company are reasonably accessible to the public. It is not intended as a substitute for other service or as a means of providing an alternative service at a lower charge. Semi-public telephones are furnished if the nature and amount of usage indicate that it is suited to meet requirements at the following types of locations, and at the option of the Company:
 1. Where there is an appreciable demand for service on the part of transients but where in the opinion of the Company, the installation of a public telephone is not warranted.
 2. Where there is a collective use of the service by a relatively stable body of guest, members of clubs or transients.
 3. Where the demand for service is for a combination of customer and transient usage.
- B. Subscribers may display telephone signs furnished by the Company and allow the use of the station to the general public.
- C. The Company may terminate service at locations where in its judgment losses by theft are likely to occur, unless the subscriber executes an agreement to indemnify the Company against such losses.
- D. The Company may terminate service at locations where any loss by theft, fraudulent practices, or from the use of slugs and spurious, mutilated or foreign coins occurs, unless the subscriber executes an agreement to indemnify the Company against such losses.
- E. Noncoin Semi-public Service is furnished to a subscriber upon the condition that use of the service by others shall not be made subject to any charge by subscriber in addition to the rates and charges of the Company as set forth in applicable tariffs.
- F. The Company has the right to require the subscriber to redeem all slugs and spurious, mutilated or foreign coins deposited in the coin collecting device at the value for which they were deposited therein and to make good all losses due to theft or fraudulent practices. In the event the subscriber refuses to redeem such slugs and spurious, mutilated or foreign coins or to make good all losses due to theft or fraudulent practices, the Company may forthwith disconnect and remove its telephone and coin collecting device.
- G. For customers subscribing to Caller ID - Deluxe, as specified in A13.19.2.H. of this Tariff, if the incoming call originates from a Company Semi-public Telephone, the name information transmitted will always be "Pay Phone".

A107.2.2 Coin Box Semi-public Service

- A. Semi-public service is equipped with a coin collector.
- B. Generally this service is provisioned two-way, however Outward Only is available at customer request.

A107.2.3 Non-coin Semi-public Service

- A. Semi-public service will be provided without a coin box.
- B. Generally this service is provisioned Outward Only, however two-way service is available at customer request.

A107.2.4 Rates and Charges

- A. Semi-public telephone service is furnished at the following basic charge¹ plus message charges.

1. Local message

	Rate	USOC
(a) Each local message	\$25	NA

- B. Local messages from Non-Dial Tone First equipped semi-public telephones are charged for at 10 cents each until such time as the semi-public telephone is equipped for Dial Tone First.

1. Local message

(a) Each local message	.10	NA
------------------------	-----	----

Note 1: The monthly rate is the Business Individual Line Flat Rate. Refer to A3.2.1.B.5. or 6.

2. The Company will continue to provide maintenance for this Company-provided equipment subject to the availability of parts and/or equipment.

A107.2.6 Extended Network Interface

(Obsoleted 9-2-96, Type 2. Not offered for installations on and after September 2, 1996.)

A. Description

1. An Extended Network Interface is offered by the Company to provide for the connection of customer premises equipment to a Semipublic telephone line on an extension only basis. The Extended Network Interface also provides privacy at the coin station. It consists of a privacy kit, associated Company provided wiring originating within the coin instrument, and a jack.
2. The Extended Network Interface allows limited outward dialing where the Semipublic service is operating in the Dial Tone First mode. Any calls that can be originated at the Dial Tone First coin station without depositing coins can be made through the telephone instrument connected via the Interface provided that said instrument is equipped with the same dial operation (rotary or Touch-Tone®) as the coin station.

B. Regulations

1. The Extended Network Interface is provided by the Company for use with voice grade service only. The Company is not responsible or liable for defects or other problems associated with other type transmissions such as any data or alarm transmissions. A maximum of one Extended Network Interface per line is permitted. The Company will guarantee operation of the Extended Network Interface with no more than one (1) customer provided extension set and one (1) customer provided auxiliary ringer, and subject to the following installation constraints:
 - a. The Extended Network Interface wiring should not be located, exposed or accessible within ten (10) linear feet of the coin set.
 - b. The Company will provide a maximum of thirty-five (35) linear feet of wire to the Extended Network Interface.
 - c. The Company will provide a minimum loop current at the Extended Network Interface in accordance with FCC registration requirements.
 - d. Accessibility of installation by Company personnel and in accordance with installation procedures.
2. The Extended Network Interface must be requested by the customer and provided by the Company prior to connection of any customer premises equipment.
3. Customer premises equipment must be connected to the network via the Extended Network Interface through a standard plug or adapter in accordance with Part 68 of the FCC Rules and Regulations.
4. The Company is not liable for damages resulting from discontinuance of service to customer premises equipment resulting from storms, power outages, or other natural occurrences.
5. The customer is liable for damages to the Extended Network Interface or associated Company provided equipment which, in the opinion of the Company, were caused by tampering with said equipment or as a result of negligence.
6. The Company has the right to terminate service provided by the Extended Network Interface to prevent harm to the network or to prevent fraud.
7. The Company is not liable for transmission difficulties caused by customer owned equipment defects or improper use of the Extended Network Interface.
8. The Company is not liable for damages or harm arising from the customer's use of the Extended Network Interface unless such accident or injury is due to gross negligence of the Company.

A7. COIN TELEPHONE SERVICE

A7.1 Public Telephone Service

A7.1.1 Definition And Purpose Of Public Telephones

A public telephone is an exchange station installed at the Company's initiative or at its option, at a location chosen or accepted by the Company as suitable and necessary for furnishing service to the general public. Public telephones are installed for the use of the general public and their use by any occupants of the premises in which they are located is only incidental to their principal purpose.

A7.1.2 Public Telephone Locations And Requirements

- A. The Company recognizes its responsibility for providing adequate telephone facilities to meet all reasonable public requirements, and the decision as to the extent, character, and location of the public telephone facilities rests with the Company.
- B. In the selection of premises the Company endeavors to secure the most suitable of those available for the purpose, public convenience considered. The character of the premises or the location of the equipment should not be such as to offer risk to the Company's equipment or receipts.
- C. For customers subscribing to Caller ID - Deluxe, as specified in A13.19.2.H. of this Tariff, if the incoming call originates from a Company public telephone, the name information transmitted will always be "Pay Phone".
- D. At the location provider's request and at the Company's option, the Company may restrict calls from being placed at any specific public telephone during certain time of day periods in the interest of public safety and welfare. Access to 911 Emergency Service shall not be prevented at any time.

A7.1.3 Equipment

- A. Public telephones are ordinarily connected with individual lines and are equipped with coin collecting devices; however, at the option of the Company, Company Attended Public Telephones or coinless public telephones may be furnished.
- B. Booths are furnished when in the judgment of the Company they are warranted by the estimated amount of traffic, or by the character of the location, as in lobbies, waiting rooms, etc.
- C. Additional station sets are not furnished in connection with public telephone service.
- D. In all cases, the Company furnishes and displays such of its standard signs as are necessary to properly identify the station.
- E. Public Telephone Service may be arranged to provide Public Facsimile Service and/or to allow personal computer access capability in connection with appropriately installed network interface facilities.
- F. At the request of the location provider and at the Company's option Public Telephone Service may be arranged at certain locations, such as airports and shopping centers, to allow local calls to be forwarded to on premise security or information telephone numbers via customized speed dial capability at no charge to the caller. Such calls will be charged to the location provider at the local message rate specified in A7.1.4 of this Tariff.

A7.1.4 Message Charges

- A. Local messages from public telephones are charged for as follows, and long distance messages are charged at the established long distance telephone rates.
 1. Local Message

(a) Each

Rate	USOC
\$.25	NA

A7. COIN TELEPHONE SERVICE**A7.1 Public Telephone Service (Cont'd)****A7.1.7 Inmate Calling Service (ICS)**

- A. Public telephones will be provided at the option of the Company for the exclusive use of inmates served within the confines of a penal, correctional, or mental institution where potential usage by inmates warrants establishing the service. The Inmate Calling Service (ICS) "administrator" is the executive officer or person designated by the executive officer of the penal, correctional, or mental institution.
- B. Subject to other applicable provisions of this Tariff, the following provisions also apply to public ICS lines:
 - 1. May be arranged for outward only calling.
 - 2. May be arranged by the administrator to terminate calls after a certain amount of conversation time or in cases of emergency in accordance with any Rules or Regulations of the Commission. The Company will not provide credit or equivalent service to the called or calling parties for such calls.
 - 3. Shall be arranged to block Directory Assistance calls.
 - 4. Unrestricted public telephone service may be provided at the administrator's request in a fully supervised location.
 - 5. Shall be arranged to allow only 0+ collect calls for local, intraLATA, and interLATA calls and to block all other calling including, but not limited to, local direct, credit card, third number, 1+ sent-paid, 0+ sent-paid, 0- sent-paid, all 0-, 700, 800, 900, 976, 950, 911, 10XXX, and 101XXXX. Where, however, the Company can block additional digit dialing after initial call set-up, 1+ long distance and seven digit local calling may be permitted upon request of the administrator.
 - 6. May be arranged for seven digit sent-paid local calling and for 0+ collect calling for intraLATA, and interLATA calling.
 - 7. May be arranged by the administrator to limit individual inmate calls to approved telephone numbers.
 - 8. May be arranged by the administrator to block access to certain telephone numbers.
 - 9. At the request of the facility administrator, call detail information, such as date and time of call, duration of calls, and called and calling telephone numbers, may be furnished to the facility where prison authorities stipulate such information appropriate in preventing or identifying abuse or unlawful use of service and where the prison authorities stipulate that the provision of such information is not in violation of any federal, state or local laws, regulations or orders.
- C. At the request of the facility administrator, the Company may provide inmates with the capability to make local calls to public defender telephone numbers at no charge. Such calls will be charged to the administrator at the local message charges specified in A7.1.4 of this Tariff.
- D. A notice shall be conspicuously displayed near ICS telephones which notifies inmates that the prison facility may monitor, time and restrict service from such telephones and that information, such as date and time of call, duration of call, and originating and terminating number, may be furnished to the facility, and further, that the use of these telephones constitutes consent to this service.
- E. Where facilities permit, ICS may be arranged to detect Three-Way Calling. At the request of the facility administrator, when Three-Way Calling is detected, the call may be disconnected. No credit will be given if such a call is disconnected.
- F. Generally, access lines to this service must be dedicated with one line for each station located within the inmate served area. The only permitted exception to this requirement is as follows:

When a station cannot be accessed by an end user, the access line which otherwise would have served that station may be used to serve a station which can be accessed by an end user. The resulting service must be such that every station which can be accessed by an end user at any given time must be provided access to the public switched network on the same basis as single party service.

A7.1.8 Reserved For Future Use

EFFECTIVE: May 18, 1993

A7. COIN TELEPHONE SERVICE

A7.2 Semipublic Telephone Service

A7.2.1 Definition And Requirements

- A. Semipublic telephone service is that class of individual line exchange service furnished in locations which, in the judgment of the Company, are reasonably accessible to the public. It is not intended as a substitute for other service or as a means of providing an alternative service at a lower charge. Semipublic telephones are furnished if the nature and amount of usage indicate that it is suited to meet requirements at the following types of locations, and at the option of the Company.
 - 1. Where there is an appreciable demand for service on the part of transients but where in the opinion of the Company the installation of a public telephone is not warranted.
 - 2. Where there is a collective use of the service by a relatively stable body of guests, members of clubs or transients.
 - 3. Where the demand for service is for a combination of customers and transient usage.
- B. Subscribers may display telephone signs furnished by the Company and allow the use of the station to the general public.
- C. The Company may terminate service at locations where in its judgment losses by theft are likely to occur, unless the subscriber executes an agreement to indemnify the Company against such losses.
- D. Semipublic service will be equipped with or without a coin-box.
- E. The Company has the right to require the subscriber to redeem all slugs and spurious, mutilated or foreign coins deposited in the coin collecting device at the value for which they were deposited therein and to make good all losses due to theft or fraudulent practices. In the event the subscriber refuses to redeem such slugs and spurious, mutilated or foreign coins or to make good all losses due to theft or fraudulent practices, the Company may forthwith disconnect and remove its telephone and coin collecting device.
- F. The Company may, at its option, terminate this service to a subscriber when the amount of usage is considered insufficient for its continued provision.
- G. Non-coin semipublic service is furnished to a subscriber upon the condition that use of the service by others shall not be made subject to any charge by the subscriber in addition to the rates and charges of the Company as set forth in applicable tariffs.
- H. For customers subscribing to Caller ID - Deluxe, as specified in A13.19.2.H. of this Tariff, if the incoming call originates from a Company semipublic telephone, the name information transmitted will always be "Pay Phone".

(N)

A7.2.2 Coin Box Semipublic Service

- A. Semipublic service equipped with coin box.
- B. Generally this service is provisioned two-way, however outward only is available at customer request.

A7.2.3 Non-coin Semipublic Service

- A. Semipublic service equipped without coin box.
- B. Generally this service is provisioned outward only, however two-way service is available at customer request.

B. Semipublic Additional Set¹

1. One additional set may be provided in connection with semipublic telephone service for the exclusive use of the subscriber for answering purposes only. This set cannot have a dial and must be located in the same room as, in view of, and within approximately twenty-five (25) feet of the semipublic telephone. On all new installations after January 1, 1983, a Company-provided ENI (Extended Network Interface) will be required in order to allow a customer-provided or a Company-provided additional set. The ENI consists of the privacy module, wiring from the main semipublic station to a modular jack, and the jack itself at the additional set location. All such sets, as described above must be registered and equipped with a modular plug. Long cords are not permitted on an additional set.

Note 1: Service Charges specified in Section A4. of this Tariff apply to service connection, moves and changes.

A7. COIN TELEPHONE SERVICE

A7.4 Access Line Service For Customer-Provided Public Telephones

A7.4.1 Definition And Requirements

Access line service for customer-owned coin operated telephone (COCOT) is an exchange line service provided at the request of a subscriber for telecommunications use by the general public. *This access line service is not available without an authorization number issued by the Tennessee Public Service Commission (TPSC). The term COCOT is used interchangeably within this Tariff and in the TPSC Rules and Regulations with Public Pay Telephone Service provided by an owner or operator who is not a public telephone company certified by the Commission.*

- A. (DELETED)
- B. (DELETED)

A7. COIN TELEPHONE SERVICE

A7.4 Access Line Service For Customer-Provided Public Telephones(Cont'd)

A7.4.1 Definition And Requirements (Cont'd)

B. (DELETED) (Cont'd)

- C. Every company or individual, who is not a public telephone company certified by the Commission in accordance with TCA 65-4-201, operating a public pay telephone instrument located in the state of Tennessee connected with or to be connected with the public network shall be authorized by the Commission to provide pay telephone service in accordance with Rules in Chapter 1220-4-2. Customer-provided public pay telephone service shall mean the resale of local service and/or intrastate toll telephone service through customer or telephone company provided equipment which is coin operated or coinless and whose calls are sent paid or non-sent paid.

In order to insure uniformity throughout the state with regard to the provision of pay telephone service to the public, the owner or operator of a public pay telephone service seeking authorization to operate a pay telephone service shall agree to abide by the Rules of the TPSC as outlined in Chapter 1220-4-2 including, but not limited to the following:

1. The following calls shall be provided without depositing money and free of charge to the customer: calls to the Company's operator; 911 or emergency numbers; local and intrastate directory assistance numbers; toll-free and 800 service numbers; pay phone repair and refund numbers; and interexchange access numbers.
2. Local call charges, including operator assistance surcharges, shall not exceed the amount authorized by the TPSC for a local call from pay telephones operated by the Company.
3. The public pay telephone shall provide the following: two way calling capability (unless waived by the Commission); no time limits on calls; the acceptance of nickels, dimes and quarters; and coin return for incomplete calls (coinless phones shall not be required to accept coins).
4. All public pay telephone instruments installed after July 1, 1990 shall be installed in accordance with the requirements of the American National Standards Institute for Buildings and Facilities - Providing Accessibility and Usability for Physically Handicapped People, ANSI, A.117.1 (1986), Section 4.29, Telephones. Provided, however, that in a given location where an owner has installed more than one instrument, only one pay telephone instrument shall be required to meet those requirements.
5. All public pay telephone instruments shall comply with Commission approved telecommunications industry standards and the current National Electric Code.
6. Local telephone directories shall be provided at each pay telephone service location.
7. The owner shall read and comply with all Commission rules and regulations governing public pay telephone service.
8. The owner shall charge for intrastate toll calls, including operator assistance surcharges, no more than the rates approved by the Commission for the Company and the dominant interexchange carrier in the state.
9. The owner shall provide an instrument capable of completing local and long distance calls. Provided however, that a coinless pay telephone is exempt from this requirement as long as the instrument is located in close proximity or next to a pay phone with local and long distance calling capabilities.
10. The owner agrees to provide customer access to all interexchange carriers certificated to do business in Tennessee in the interexchange carrier's preferred manner as officially designated by said carrier to the Commission.

A7.4 Access Line Service For Customer-Provided Public Telephones (Cont'd)

A7.4.1 Definition and Requirements (Cont'd)

D. Additional Requirements (Cont'd)

2. Completion of local and IntraLATA Toll Messages are provided by the Company.
3. The service is furnished subject to the condition that all applicable regulations in Section A2. of this Tariff will be adhered to, with the exception of A2.2.1.A. and A2.2.1.B., which restrict the use of service and prohibit payment to the customer by another for use of the service.
4. The service is provided for use by the subscriber but may be used by others when so authorized by the subscriber, provided that all such usage is subject to the provisions of this Tariff.
5. This service is not subject to concessions.
6. This service may not be suspended at a reduced rate.
7. This access line may include an optional screening feature to prevent the operator from allowing toll charges against the subscriber's line. *With the exception of SmartLine® service provided in A7.8 of this Tariff*, the operator also can not perform coin collecting functions.
8. With the exception of Coin Refund and Repair Referral Service (CRS) provided in A7.10 of this Tariff, the Company is not responsible for refunds of coins deposited in customer-provided public pay telephones.
9. The subscriber to this service will be responsible for any and all toll charges billed to the subscriber's account.
10. The public pay telephone instrument must have an FCC Registration Number and must be connected to the Company's network in compliance with Part 68 of the FCC Rules and Regulations.
11. The public pay telephone service access line rate will be 90 percent of the Business Standard Measured rate effective in each exchange, plus the usage rates in A3.2.3.C.1.b. of this Tariff.
12. The public pay telephone service may *only be connected* to access line service *for customer-provided public telephones as provided herein or SmartLine® service for public telephone access as provided in A7.8 of this Tariff*. It must be served on a single public telephone access line directly connected to the Company's network and billed at the tariff rate.
13. The public pay telephone service instrument may not be attached to an extension instrument without a privacy cut-off to automatically disconnect when the receiver is lifted for service. The requirements as set forth in A7.2.5.B. concerning semipublic additional sets shall also apply to the connection of an extension to an authorized instrument, with the exception that such extension may have a dial or tone pad.
14. The public pay telephone instrument shall display prominently on its face the following:
 - a. A statement identifying the charge and operating instructions for its use.
 - b. A statement indicating the name of the owner of the instrument and identifying the long distance carrier serving the instrument.
 - c. A telephone number, which can be reached without charge or without having to deposit money where users can report malfunctions and obtain refunds.

10. Zone charges are charged on the same basis as applies to other types of individual line service.
11. Directory listings in connection with two-way public telephone access lines are furnished under the same rates and regulations in Tariff Section A6. as other business service. Listings are not available for outward coinless public telephone access lines.
12. Non-sent paid local calls will be rated to the end user at the rate set forth in A7.1 plus the appropriate operator surcharge in Section A3. of this Tariff.

A7.4.6 Reserved For Future Use**A7.4.7 Customer Provided Public Inmate Calling Service (CPPICS)**

- A. Access line service for customer-provided public telephone service when provided for exclusive use of inmates (hereafter called Customer-Provided Public Inmate Calling Service, or CPPICS) served within the confines of a penal, correctional or mental institution.
- B. Generally, access lines to this service must be dedicated with one line for each station located within the inmate served area. The only permitted exception to this requirement is as follows:
When a station cannot be accessed by an end user, the access line which otherwise would have served that station may be used to serve a station which can be accessed by an end user. The resulting service must be such that every station which can be accessed by an end user at any given time must be provided access to the public switched network on the same basis as single party service.
- C. Charges to initiate public calls utilizing these access lines are not to exceed the amounts specified in this Section for Public Telephone Service.
- D. In lieu of Public Telephone Access Service as described elsewhere in A7.4, CPE stations subscribing to CPPICS are provisioned by the customer as follows:
 1. May be arranged for outward only calling.
 2. May be arranged to terminate calls after a certain amount of conversation time, or in cases of emergency in accordance with any Rules and Regulations of the Commission and upon notification to the Company of such an arrangement. The Company will not provide credit or equivalent service to the called or calling parties for such calls.
 3. Shall be arranged to block Directory Assistance calls.
 4. Unrestricted public telephone service may be provided at the administrator's request in a fully supervised location.
 5. Shall be arranged to allow only 0+ collect calls for local, intraLATA, and interLATA calls and to block all other calling including, but not limited to, local direct, credit card, third number, 1+ sent-paid, 0+ sent-paid, 0- sent-paid, all 0-, 700, 800, 900, 976, 950, 911, 10XXX and 101XXXX. Where, however, the customer-provided stations can block additional digit dialing after initial call set-up, 1+ long distance and seven digit local calling may be permitted.
 6. May be arranged for seven digit sent-paid local calling and for 0+ collect calling for intraLATA, and interLATA calling.
 7. May be arranged to limit individual inmate calls to approved telephone numbers.
 8. May be arranged to block access to certain telephone numbers.

A7. COIN TELEPHONE SERVICE**A7.4 Access Line Service For Customer-Provided Public Telephones (Cont'd)****A7.4.7 Customer Provided Public Inmate Calling Service (CPPICS) (Cont'd)****D. (Cont'd)**

9. At the request of the facility administrator, call detail information, such as date and time of call, duration of calls, and called and calling telephone numbers, may be furnished to the facility where prison authorities stipulate such information appropriate in preventing or identifying abuse or unlawful use of service and where the prison authorities stipulate that the provision of such information is not in violation of any federal, state or local laws, regulations or orders.
- E. Rates and charges for access line service for CPPICS are provided in A7.4.5 of this Tariff.
- F. Except as modified herein, applicable regulations and requirements as set forth elsewhere in A7.4 for customer-provided public telephones will apply to CPPICS.
- G. A notice shall be conspicuously displayed near CPPICS telephones which notifies inmates that the prison facility may monitor, time and restrict service from such telephones and that information, such as date and time of call, duration of call, and originating and terminating number, may be furnished to the facility, and further, that the use of these telephones constitutes consent to this service.

A7.5 Reserved For Future Use**A7.6 Reserved For Future Use****A7.7 Reserved For Future Use****A7.8 SmartLine® Service for Public Telephone Access****A7.8.1 General**

- A. SmartLine® service is a standard Dial Tone First (DTF) coin line for customer provided pay telephones.
- B. SmartLine® service will be provided from central offices where facilities are available.
- C. This service is provided subject to the requirements set forth in A7.4.1, and Section A2. of this Tariff.
- D. Features of the SmartLine® service are as follows:
 1. Service will be provided on a two way basis, except where a specific exemption has been granted. There will be no charge imposed for incoming calls.
 2. Service will be provided on a DTF basis to enable end users to dial certain calls without requiring coin deposits, e.g. 911 Emergency Calls, directory assistance, and non-sent paid calls.
 3. Central office blocking of 900 and N11 calls will be provided.
 4. Operator Call Screening will be provided to alert operator and carrier systems that the call is originating from a SmartLine® service line and may require special handling and billing treatment.
 5. Billed Number Screening will be provided to indicate in validation data bases that incoming collect and bill to third number calls are not to be billed to the line.
 6. Coin signaling (coin collect and coin return) will be provided by the network. Coin collect is used when a call has been completed and coin return is used if a no answer or busy condition is encountered.
 7. Standard recorded announcements currently used with the Company's Public Telephone service will be utilized with SmartLine® service.
